Artikelnummer:	29283
EAN-Nummer:	4000870292839
Hersteller:	Paulmann

Beschreibungstext:
With this black matt GU10 light bulb, you can always choose the right light color. Using a dip switch, the color temperature can be flexibly changed between two homely warm white tones (2700K and 3000K) and a functional neutral white (4000K) - ideal for a wide range of applications from living rooms to workplaces. The light color settings can be made both during installation and retrospectively. The brightness can be dimmed continuously as required. With an output of 6,9W and 650lm and a beam angle of 50°, the lamp is suitable for the targeted illumination of work or reading areas as well as for general lighting in offices or living areas. The light bulb fits into all GU10 sockets and can be used in recessed spotlights, Spots and a wide variety of lights. The lifetime of 25,000 hours ensures permanently reliable lighting. Paulmann LED light bulbs with the eye friendly seal provide comfortable light that is easy on the eyes. Whether working, reading or relaxing, the light bulbs contribute to optimum visual comfort.
